About the ComparativeInsite Report

The ComparativeInsite report provides an organization with a broad comparison of the demographic profile of a defined mission area with a demographic profile of an organization's core people*. It accomplishes this by matching a select set of variables from within the Experian Mosaic Segment of a study area with that part of the study area in which an organization's core people reside. To accomplish this, a Mosaic Profile of both the study area and the organization's core people is generated within the MissionInsite PeopleView System.

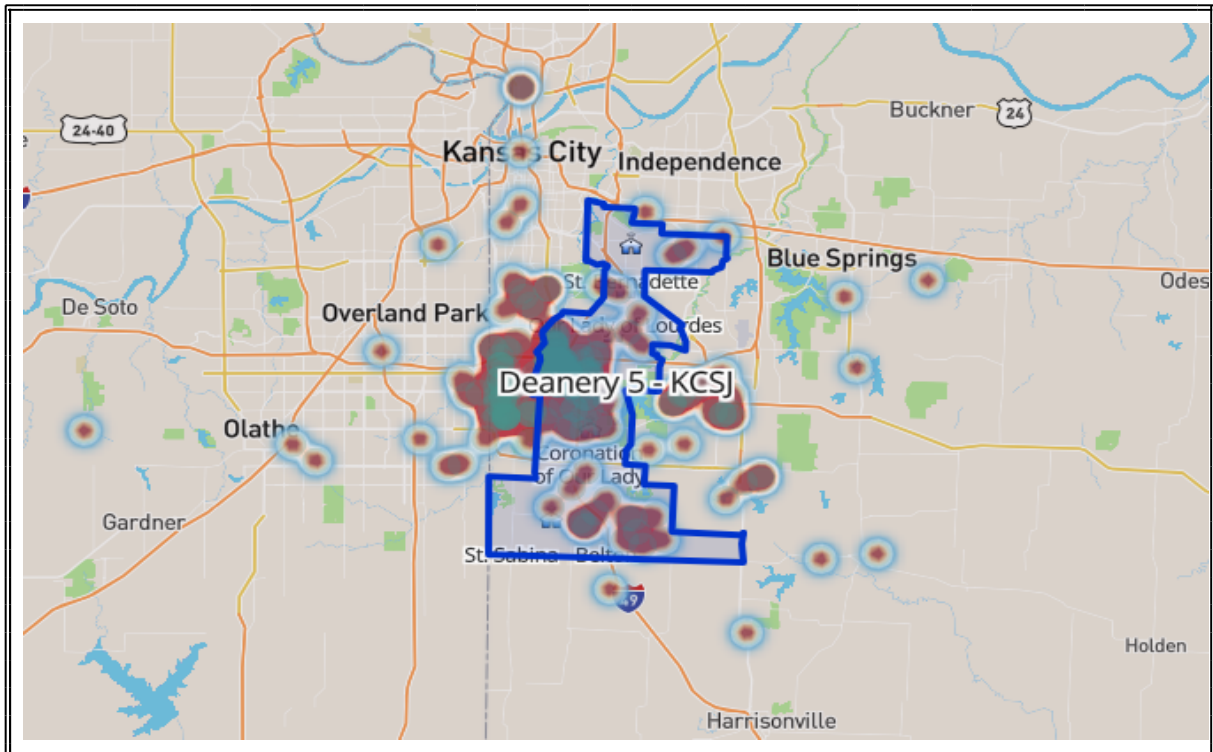

Three Sections

• Who Are We? Who is Our Neighbor?

• People and Community Mosaic Profile Comparison

• Financial Potential Estimate

Notes:

1. Percentages for Average Age Head of Household and Estimated Household Income will not add up to 100% unless all 71 types are found in a study area (which is unlikely in most cases).
2. Presence of a Child sub categories will not add up to the Presence of a Child because a household may cross subcategories thus the total of the subcategories can be greater than the primary category.
3. The Diversity score is based upon the racial/ethnic diversity of each Mosaic Type. The scale is 0 to 5 with 0 a very low diversity and 5 very high diversity.
4. The Racial/Ethnic categories overlap somewhat. A household may include two or more categories. For a real analysis of racial/ethnicity, please obtain a regular demographic report from MissionInsite.
